Table of contents

1 Project Abstracts.....3
1.1 Placing Abstracts in Context within the Target Architecture.....3
1.2 Abstracts of Projects within the Target Presentation Layer.....3
1.2.1 Contact Management (EA-45).....3
1.2.2 One-VA Web Content Management Standardization.....3
1.2.3 One-VA Web Presentation Standardization.....4
1.2.4 VistA Imaging (EA-17).....4
1.3 Abstracts of Projects within the Target Business Rules Layer.....4
1.3.1 Document & Correspondence Management System Replacement (EA-57).....4
1.3.2 FLITE - Financial Management Replacement (EA-40).....4
1.3.3 Interactive Health Records: MyHealtheVet (EA-42).....5
1.3.4 The Education Expert System (TEES)-2007 (EA-25).....5
1.3.5 VA Learning Management System e-Training (EA-16).....5
1.3.6 VA Payroll Replacement System - e-Payroll (EA-34).....5
1.3.7 VA Personal Identification Verification (PIV) Project (EA-62).....5
1.3.8 VA-Wide e-Travel Solution (EA-19).....5
1.3.9 VBA Application Migration Project (VAMPS) EA-60.....6
1.3.10 VHA Enrollment Enhancement (EA-63).....6
1.3.11 VHA Medical and Prosthetic Research (EA-13).....6
1.3.12 VHA Patient Financial Services System - PFSS (EA-05).....6
1.3.13 VHA Pharmacy Re-Engineering and IT Support (EA-14).....6
1.3.14 VHA VistA Foundation Modernization (EA-64).....7
1.3.15 VHA VistA Scheduling Replacement Project (EA-15).....7
1.3.16 VistA Laboratory Information System Replacement (EA-18).....7

1. Project Abstracts

1.1. Placing Abstracts in Context within the Target Architecture

Beginning at the top of the Target Architecture discussion:

1. The *Target Architecture Introduction* described the purpose and methodology behind the One-VA Target Architecture;
2. The *Target Architecture Strategy* section articulated the Chief Architect's vision of the desired Target Architecture End-State, at a five to seven year planning horizon;
3. The *Target Architecture Transition Plan* identified the actions that the Office of Enterprise Architecture Management is taking to implement these transition changes, across three distinct time phases within that planning horizon;
4. The *Target Project Abstract* section discusses each IT development project within the current IT portfolio. It identifies the project's impact upon the enterprise and the Target End-State. The following Reuse, Redundancy and Gap Analysis section examines which portions of the Target End-State have not been addressed by the projects currently within the portfolio, and it identifies additional projects needed to meet that end-state.

The following project abstracts are grouped based upon the five layers established for the target architecture. The significance of this grouping is only to provide a convenient method for tracing a project from one Target Architecture discussion to any other.

Access an abstract grouped below by selecting the hyperlink to its externally referenced PDF document. When available, access the current Enterprise Architecture OMB 300 assessment via the corresponding hyperlink.

1.2. Abstracts of Projects within the Target Presentation Layer

1.2.1. Contact Management (EA-45)
